

Create a Metric

Name:

Unit of measure:

Date span: Starting for i.e. until

Frequency: I want to enter/track the value of this metric

Data entry: Numbers entered will be...

- regular, as in no running total.
- cumulative, as in add a day's number to the running total.

Pipe data into this Metric from a worksheet...

Target: YES ...starting at points
and ending at points
The goal is to the target value (i.e. **higher** is better)

Display: Show at most days into the future.

- Automatically scale the y-axis
- Always include zero in the y-axis
- Fit to data values on the y-axis
- Show between and on the y-axis
- Enable quick toggle between regular and cumulative

Reminders? NO
